Ethiopia • Haiti • Honduras

Kenya • Nicaragua

Philippines • Somalia

South Sudan • Uganda • Zambia

Feeding Programs

With the help of our partners, ASC is able to help provide over a million meals for needy and starving children each year throughout our network of orphanages, schools, emergency aid programs, children's homes and feeding centers across Africa, Southeast Asia and Central America. These programs work to save lives and ensure healthy development for children living in desperate need.

Clean Water Projects

Access to clean water is a huge problem affecting millions of children across the globe. In many areas, women and children must walk hours to find water which is often contaminated by animal remains, human waste, parasites or bacteria. In order to help prevent water-borne illnesses, ASC works with local groups in Kenya to help provide life-saving clean water tanks and teach families the methods and benefits of hygienic care.

Homes for Children

ASC supports Children's Homes for orphaned and abandoned children, which provide nutritious meals, a safe place to call home, educational programs, clean water, medical care, and the love of a family to children who otherwise would not have access to some of life's most vital necessities.

Kenya

In our Samaritan Centers in Nakuru, Kenya, more than 120 needy boys and girls have found a safe and loving home. Here the children are able to attend school and learn practical skills. They receive regular meals, medical care, as well as emotional and psychological guidance. Over time they have learned to take care of each other and share in the responsibility of caring for their home.

Uganda

Our partner children's center in Uganda provides around the clock care for more than 150 orphaned and abandoned children and provides free primary and secondary education for more than 600 children in the region! This safe haven offers new hope to underprivileged children who have experienced severe hardship during their young lives. Many had been orphaned or abandoned, left to fend for themselves on the streets prior to coming to our home! Within the home, children live in small "family groups", a process which encourages the children to grow with a strong sense of self and security.

Education

Education is proven to be the single most effective tool in fighting the cycle of poverty and is a major emphasis of the work we do all over the world. ASC supports educational programs in countries across the globe, including the Philippines, Kenya, Uganda and Nicaragua. Here we help provide a priceless education for children to give them a brighter and more prosperous outlook for the future.

Zana Community Children's Center

The Zana Children's Center in Kampala, Uganda provides primary and secondary education to more than 500 from throughout the region. Many of these children are orphans or have been forced to live on the streets during their short lives. Here the needy children receive two hot meals a day, school clothing, medical care and a quality education. At Zana, children receive the tools necessary to create a better, more prosperous future.

Laguna Center of Hope

Each day more than 300 children attend school at the Laguna Center of Hope. Here children are provided a life-changing education, hot daily meals, and an environment that allows children to truly experience life as a child! The Center of Hope serves many children who have been victimized by physical abuse and offers counseling and therapy services to assist children in recovering from its crippling effects.

Medical Care

Over the past year ASC has been blessed with the opportunity to provide donations of lifesaving medicines and medical supplies for the poor and needy in Honduras. These medicines are distributed throughout our trusted network of hospitals and clinics which provide medical assistance for desperately needy children and families free of charge.

HIV/AIDS Prevention

The HIV/AIDS Epidemic continues to ravage millions across Africa, Southeast Asia, and beyond, leaving countless children orphaned in its wake. ASC works with clinics in countries like Haiti, Kenya, and Uganda which focus on the treatment and prevention of these horrible diseases, as well as providing safe homes for the children left parentless due to HIV related deaths.

Countries Aid for Starving Children Serves

Haiti: ASC partners with local groups to help provide medical care and special therapeutic foods to combat malnourishment. ASC also supports a feeding center in Port-au-Prince which serves more than 1700 meals every day.

Nicaragua: ASC works with a local group to help provide a regular feeding program in the city of Las Brasiles, Nicaragua, which focuses on providing meals for desperately needy children.

Philippines: ASC support a children's center which specializes in child protection advocacy and services for abused children. Here we help provide a safe, loving home, counseling, education and other child development services.

South Sudan: ASC's Emergency Relief Team continues to travel to dangerous regions in South Sudan, where few other agencies dare to go, in order to provide highly needed relief to families displaced by unfortunate violence!

Somalia: ASC helped provide regular distributions containing tons of Food Aid and other relief materials for more than 300 families living in desperate need.

Ethiopia: After a years long drought in Ethiopia was struck with heavy flooding, further decimating crops in the nation. ASC helped to provide emergency food and other relief for thousands to assist in this great need.

Uganda: ASC supports programs which provide the full course of care for a child in need. These include feeding, community outreach, education and vocational training programs, to name only a few!

Kenya: The Samaritan Centers in Nakuru, Kenya are home to over 120 boys and girls. These children receive around the clock care at the home which includes regular meals, medical care, and education in a warm family environment.

Zambia: ASC supports a crisis nursery which specializes in providing care for newborns and infants who have been orphaned or abandoned. The nurses at the home provide all care necessary to ensure healthy development.
